### Hostler Burrows at Salon Art + Design 2019

Hostler Burrows presented *Crystal Atmosphere* by contemporary Swedish artist and designer Frida Fjellman, a veritable 'crystal forest' made by a sequence of suspended hand-blown glass prisms laced to one another by a drooping chain. Designed, in Fjellman's words, to "impart a sense of calm as well as to intrigue and fascinate," the experience is at once unabashedly romantic and quietly poetic.
